

IN THE SPECIFICATION

Please replace the paragraph at page 2, lines 6-10, with the following rewritten paragraph:

Particularly, a mobile terminal apparatus such as a cellular phone includes a number of functions which the CPU should achieve and operations which the CPU should execute to achieve recently prevailing color display ~~function~~ functions, and these number of functions have been increased, so that load on the CPU has been increased more and more.

Please replace the paragraph at page 8, lines 19-24, with the following rewritten paragraph:

Referring to Fig. 1, the image display apparatus of the first embodiment comprises a system driver ~~[[1]]~~ 10, a display unit 20 composed of, for example, liquid crystal display (LCD), and a CPU 30 mounted in the system for supplying a screen control signal to the system driver 10 to output the display data on the display unit 20.
